

XCMG STORY

XCMG RECONDITIONED MACHINE

XCMG reconditioned machine is the second-hand machine program launched by XCMG for the post market. XCMG takes advantage of its dealers network to collect the second-hand XCMG machine that falls into strict standards: good condition, full function and low service hours. The returned machine is then disassembled, repaired, painted, rebuilt and tested officially by XCMG, and the product life is therefore extended. The price of XCMG reconditioned machine is far lower than that of the new one, but its performance and safety are not compromised thanks to XCMG's state-of-the-art processes and technologies. In order to dispel customers' concerns, XCMG establishes a strict evaluation system for reconditioned machines and invites SGS to issue third-party certification.

OUR TEAM

150+ SPECIALISTS

150+ specialists participate in the reconditioning process.

Inspection Team
Certified professional assessors who have audited for more than 10 years on various types of used and new machines.

Reconditioning and Repairing Team
Skilled and professional workers capable of repairing all worn parts with genuine XCMG spare parts.

Issuing Report Team
Certified assessor inspects, tests and certifies the reconditioned machine. SGS provides the third-party inspection certificate.

RECONDITION PROCESSES

RECONDITION PROCESSES OF THE USED

We maintain a meticulous and rigorous attitude toward quality, focusing on extraordinary creativity, elaborate designs and exquisite craftsmanship.

COLLECTION
To collect the second-hand machines, XCMG sends its sales and service personnel to various construction sites to collect the second-hand machines with high depreciation, low working hours and good maintenance records.

INSPECTION
Certified professional assessors who have worked for more than 10 years on all types of construction machines. More than 200 items are checked and reported by SGS standard. Recondition plan is then defined.

REPAIRING
Skilled and professional workers capable of repairing all worn parts with genuine XCMG spare parts.

TESTING
To finish the last procedures, assess the performance and durability of the machine. Unqualified products are returned to step 1.

READY FOR DELIVERY
The machine is ready for delivery.

ISSUING REPORT
Certified assessor inspects, tests and certifies the reconditioned machine. SGS provides the third-party inspection certificate.

PAINTING
The whole machine is repainted to restore its appearance. Bright as new.
